Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Vishal and Arun are discussing the properties of numbers. Vishal gives Arun two integers. He asks Arun to check if the sum of these two numbers is a multiple of their product.

Can you assist Arun and determine whether the sum is a multiple of the product?

Input Format

The input consists of two space-separated integers.

Output Format

The output prints:

1. "Sum is Multiple of Product" if the sum of the two numbers is divisible by their product.
2. "Sum is Not Multiple of Product" otherwise.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 1 2

Output: Sum is Not Multiple of Product

Answer

```
import java.util.Scanner;
class MulSum{
    public static void main(String[] args){
        Scanner sc=new Scanner(System.in);
        String line = sc.nextLine();
        String[] parts = line.split(" ");
        int a = Integer.parseInt(parts[0]);
        int b = Integer.parseInt(parts[1]);
        if((a+b)==(a*b)){
            System.out.println("Sum is Multiple of Product");
        }else{
            System.out.println("Sum is Not Multiple of Product");
        }
    }
}
```

Status : Correct
